ABOUT DERMAL FILLERS

As skin ages, it begins to lose a substance called hyaluronic acid (HA). This substance adds structure and volume, and a lack of HA causes skin to sag and wrinkle. That's where dermal fillers come into play.

Unlike face lifts that stretch the skin, dermal fillers are smooth, injectable gels made from naturally occurring hyaluronic acid. The use of dermal fillers adds volume for a more natural, youthful appearance.

Dermal fillers are a simple and safe prescription product used to restore volume to the area around the mouth, adds fullness to the lips, balances uneven lip lines, erases the downward frown lines at the corners of the mouth, as well as fills in wrinkles/creases in cheek areas, and raise scar depressions.

The procedure takes 30-45 minutes, leaves no marks or scars, and the results can be seen immediately. The effects of the treatment typically last 6-12 months.

We are pleased to offer dermal fillers at this office!

Now you can radiate beauty from the inside out by receiving dermal filler treatments from those who know it best.

Millions of people use Juvederm and Restylane to achieve a more relaxed and smooth facial appearance, while still having the freedom of expression.

Combining this with other esthetic treatments like Botox, you will have a

much more youthful appearance in just one visit.
